HOW TO: WHAT LINE TYPES WORK WITH THE APP

When customizing your templates in PDspect you have a lot of options to setup lines the way you want. All of the line types you create or add in will work on the PC version of the software, however, there are certain line types that will not appear on the app. All of the most commonly used line types do show up on the app and 99% of our inspectors will never come across a scenario where they need to know the details below, but for those inspectors who are making lines that are out of the ordinary the information below will serve as a helpful guide to know what will work with the app and what won't.

The following are the line types that will work with the app:

- 1 Q/A
- 2 Q/A
- 3 Q/A
- Rating, 1 Q/A, Note
- 1 Q/A, Note
- Note
- Text piece
- Text piece, note
- Rating, Text piece, Note
- Checkbox (up to 6 checkboxes), Note
- Rating, Checkbox (up to 6 checkboxes), Note
- Text, Checkbox (up to 6 checkboxes), Note
- Text, Checkbox (up to 6 checkboxes)
- Text, Rating, Checkbox (up to 6 checkboxes)
- Rating, Checkbox (up to 6 options), Note
- Option List (up to 6 options), Note
- Text, Option List (up to 6 options)
- Text, Option List (up to 6 options), Note
