HOW TO: CHANGE THE DEFAULT IMAGE SIZE

This document will walk you through how to edit the default image size for all new pictures that are inserted into your report.

1. With an inspection open you will want to go into Program Settings.

2. In Program Settings, you can edit the size of your pictures by changing the height and width under 'Default Image Size'. You can also choose to restore the default image size back to the out of the box setting by clicking on 'Restore Defaults'.

3. Once you edit the image height and width to the desired size, click 'OK'.
